PHYSICAL!

ABOUT THE SPEAKER:

Dr. Jibran Rashid is currently an Assistant Professor of Computer Science at the School of Science & Engineering, Habib University. His current research interests include quantum information and computation, theoretical computer science and educational technologies.

ABSTRACT OF THE TALK:

In this talk, Dr. Rashid will identify and review some of the assumptions behind Roger Penrose's proof regarding simulating human intelligence.

This scan of a normal human subject was acquired using a first-of-its-kind MRI scanner that's 10 times higher in speed and resolution than conventional systems.
